SUMMARY

I am a full-stack & blockchain developer with over 6 years of experience. Love to work with JS frameworks which are the most popular frameworks nowadays and have rich experience in web & smart contract development. I am interested in algorithm-level efficiency and have experience working both with back-end and front-end technologies as well as frameworks. It's important for me to build long-term relationships with my clients, so I'm primarily looking for long-term projects.
